2023

## ABOUT COMPANY

## BPC Group

BPC Group is an enterprise that produces juice products taking into account the requirements of the modern market, consumers and using modern technologies and production methods. The company gives priority to product quality and its safety, strictly monitors the production process and quality control of raw materials. One of the key factors is to produce products from fresh high-quality raw materials. To reduce production costs and increase efficiency, the company uses modern equipment, including production automation systems, production and business process management. The company is focused on strategic cooperation with partners

The products are presented in segments :

- **Premium** - juice brands: "BRILL" and "Wish";
- **Medium** - nectars, morses and drinks brands: "Wish", "WishMix", "Dary Azerbaijana" ("Gifts of Azerbaijan"), "Fermerskiy sad" ("Farm Garden");
- **Economy** - nectars and drinks "Wish Mix", "Juicity", "Dary Belarusi" ("Gifts of Belarus").

## ABOUT COMPANY

### We offer:

**quality product, modern packaging, excellent competitive price, individual approach and prompt resolution of issues.**

The key links in the production process at the two production sites are seven bottling lines.

Total production capacity is 176 million liters per year. Fully automated production lines are equipped with the most modern and highly productive equipment of well-known European companies.

Modern automated equipment maximizes the preservation of useful substances and provides control at all stages of the production process.

Only high-quality raw materials from Azerbaijan, Turkey, Spain, Greece, South Africa, Brazil, India and other southern countries are used in the production process. The company has an extensive supply geography, our products are represented in the markets of Russia, the Baltic States, Germany, Central Asia and the USA.

Production site

Office

Partners

- THE CONCENTRATE IS TAKEN FROM THE DRUMS BY PUMPS, AFTER WHICH IT IS PUMPED TO THE MIXING TANKS.
- THE SUGAR SYRUP IS PREPARED IN PARALLEL WITH THE CONCENTRATE PUMPING.

- THE MOST IMPORTANT UNITS OF THE PRODUCTION PLANT ARE THE PREPARATION, BLENDING, AND BOTTLING SECTIONS.
- CONCENTRATE AND SUGAR SYRUP ARE FED THROUGH FILTER ELEMENTS INTO LARGE CONTAINERS, WHERE THEY ARE MIXED AND BLENDED.

- THE RESULTING BLENDS IN THE AUTOMATIC UNIT GO THROUGH

**STAGES :**

- sterilization,
- homogenization,
- cooling.

- THE RECONSTITUTED AND PASTEURIZED JUICE IS SENT TO AN AVERAGE ASEPTIC STORAGE CONTAINER.

- THE LABORATORY STAFF IS STRICTLY MONITORED AT ALL STAGES OF PRODUCTION.
- ALL RAW MATERIALS AND COMPONENTS SUPPLIED TO THE COMPANY COMPLY WITH THE REQUIREMENTS OF REGULATORY DOCUMENTATION AND ARE ACCOMPANIED BY DOCUMENTS CERTIFYING THEIR QUALITY AND SAFETY.
